

ALISHER MUTALOV

Python Backend Developer | Data Engineer | Data Analyst\ Uzbekistan • amutalov001@gmail.com • +998 93 435 44 27 • GitHub: github.com/alishermutalov • LinkedIn: linkedin.com/in/alisher-mutalov-b725bb23b

PROFESSIONAL SUMMARY

Result-driven Python Backend Developer and Data Specialist with strong expertise in data engineering, analytics, and backend development. Proven track record in building scalable web applications, data pipelines, and interactive dashboards that drive business insights and operational efficiencies.

WORK EXPERIENCE

Intern Data Analyst — Mohirdev

Tashkent, Uzbekistan | March 2025 - May 2025

- Designed and developed interactive dashboards using Power BI to visualize business metrics.
- Processed and transformed large datasets for analytical purposes.

Support Mentor — Mohirdev, Data Science Cours

Remote | January 2025 – Present

- My main task is to review students' Data Science assignments and help them with the parts they are struggling with.
- Designed prompt templates and evaluation workflows for automation.

Python Backend Mentor — PDP School\ Tashkent, Uzbekistan | September 2023 – September 2024

- Trained junior backend developers in Python, Django, DRF, and deployment best practices.
- Conducted hands-on coding sessions and guided real-world projects.

Python Backend Developer — Astir Animation Studio\ Tashkent, Uzbekistan | June 2022 – September 2022

- Developed a web application for employee attendance tracking and task management using Django.
 - Created internal tools to enhance operational efficiency.
-

EDUCATION

PDP University

Computer Science — Completed 2 Years (2022–2024)\ Gained significant practical skills in programming and data systems. Studies discontinued due to family financial constraints.

TECHNICAL SKILLS

- **Programming:** Python, Django, Django Rest Framework, SQL, JavaScript, HTML
 - **Data Engineering:** MongoDB, PostgreSQL, BigQuery, Airbyte, dbt, Pandas, NumPy
 - **Visualization & Analytics:** Power BI, Power Query, Seaborn, Matplotlib
 - **Deployment:** Docker, Nginx, Gunicorn, Certbot
 - **Other Tools:** Git, Telegram Bot Development (aiogram v3), Google Analytics, SEO, Web Performance Optimization
-

PROJECTS

[Marosimilar Online](#) — Startup Founder

- Developed an online wedding invitation platform integrating Telegram Bot, Mini Web App, and a responsive website.
- Integrated payment solutions: Stars, Payme, Click.
- Optimized the backend to handle 1000+ invitations monthly.

Data Engineering Pipeline

- **Stack:** MongoDB → Airbyte → BigQuery → dbt
 - Designed and maintained a robust ETL pipeline for efficient data ingestion and transformation.
-

CERTIFICATIONS

- **Python Backend Development** — PDP Academy
 - **Data Science** — Mohirdev
-

LANGUAGES

- **Uzbek:** Native
 - **English:** Intermediate
 - **Russian:** B2
